

STOP ENERGY LOSS AT THE DOCK

DOCK STUFR

BEFORE

AFTER

WESCO[®]
INDUSTRIAL PRODUCTS

SEAL THE GAP. SAVE ENERGY. IMPROVE SAFETY.

The **Dock Stuf** effectively fills exposed gaps between the dock leveler and bumper, helping maintain temperature control without slowing down operations. It's flexible, low-profile design conforms securely to create a reliable seal, minimizing energy loss and preventing debris infiltration while maintaining efficient workflow.

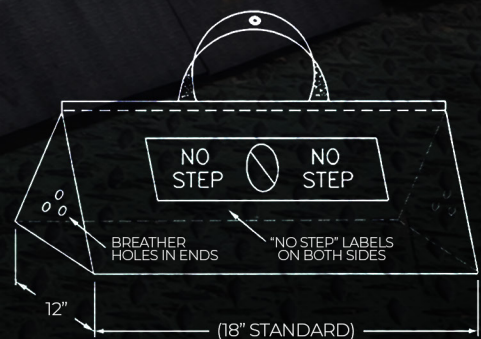

WHY DOCK STUFR?

- ✓ Enhances safety with bright orange high visibility "NO STEP" warnings
- ✓ Reduces energy loss by sealing dock gaps
- ✓ Durable, flexible heavy-duty industrial design
- ✓ Easy to install, move, & secure in place
- ✓ Maintains smooth workflow with no interference
- ✓ Reliable performance backed by a 1-year warranty

TECHNICAL SPECIFICATIONS
